

Turn your *passion* into a career

Since 1967, Jet Aviation has enabled flight in its most elegant form. Starting with a single maintenance hangar in Switzerland at Euro-Airport in Basel, we have grown to 4,000 employees and around 50 locations worldwide. We offer interior outfitting, maintenance, management and sale of aircrafts as well as charter and fixed base operations. Behind every successful project is a team of dedicated professionals who perfect the art of flying. In the hangar, on the ground and behind the scenes.

Engine Mechanic

At Jet Aviation, we take pride in delivering excellent business aviation services around the globe. We are looking for a dedicated Aircraft Engine Mechanic to help ensuring our fleet's engines are maintained to the highest standards. If you have a passion for precision and innovation in aviation, this role offers you the chance to work with world-class aircraft and contribute to exceptional service delivery.

Your mission

- **Engine & APU Maintenance** : Perform routine maintenance checks, including LRU changes, repairs, modifications hot section inspections/overhaul and troubleshooting on aircraft engines and APUs off and on wing.
- **Documentation & Compliance** : Keep detailed and accurate records of all maintenance tasks, ensuring compliance with industry regulations and internal standards. Complete required paperwork in a timely and professional manner, ensuring it meets aviation industry requirements.
- **Workplace Organization** : Maintain a clean, organized workspace by applying 5S principles, ensuring efficiency and safety at all times. Ensure tools and equipment are properly stored, maintained, and used according to company guidelines.

What we offer you

- An exciting and challenging job in a dynamic environment.
- Various opportunities for professional and personal development.
- Working with the latest technologies and tools.
- A motivated and cheerful team that looks forward to working with you.
- Our events are great! We also have lots of fun together outside of working hours.

Your profile

- Mechanical apprenticeship in the machining, automotive or motorbike industry.
- Experience in Aviation industry would be an advantage.
- High quality and safety standards oriented.
- Strong motivation to gain new knowledge.
- Always happy to support and collaborate with others.
- Fluent in English, German and/or French is a plus.

Are you ready to take off professionally and to shape the future of aviation? Then we look forward to getting to know you – talent-emea@jetaviation.com
